Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 2, 2007 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 2, 8, 14 and 18-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 3,734,348 to White in view of US 6,739,578 to Barton et al.

White shows a fuel supplier for a fuel cell as seen in Fig. 3, having a casing 60, a partition 80 dividing the casing into two chambers, an outlet port 33 connectable to the fuel cell and a flexible pressure unit 70. White is silent about the outlet being openable upon connection with the fuel cell. Barton shows a coupling mechanism for a fuel cell, as seen in Fig. 4, with a valve that is openable upon connection of the fuel line and the fuel supplier. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to modify the device of White to include a coupling mechanism that is openable upon connection to reduce

Art Unit: 3754

the possibility of fuel leakage and to facilitate connection between the supplier and the fuel cell as taught by Barton.

Response to Arguments

4. Applicant's arguments with respect to claims 1, 2, 8, 14 and 18-22 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion
